

## Special Issue

# Diagnostic, Prognostic and Therapeutic Biomarkers Related to Civilization Diseases: State-of-the-Art

### Message from the Guest Editors

Civilization diseases constitute a growing global problem, reflected in both the practical and scientific sphere of health care of specialists, e.g., diagnosticians, biotechnologists, pharmacists and medicine doctors. This Special Issue's goal is to promote the current knowledge concerning the discovery, development and implementation of novel disease-specific biomarkers in clinical practice that are useful in the diagnosis, treatment monitoring and prediction of patient outcomes. We hope for conditions including autoimmune-related disorders and cardiovascular and metabolic diseases to be at the center of attention in this Special Issue entitled "Diagnostic, Prognostic and Therapeutic Biomarkers Related to Civilization Diseases –State-of-the-Art". Furthermore, we would like to encourage interested researchers to prepare and send experimental publications as well as review articles referring to potential, innovative diagnostic tools dedicated to the diagnosis and monitoring of the effectiveness of treatments or forecasting the severity of diseases and their acute and chronic complications.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
