

## Special Issue

# Actin–Myosin Cytoskeleton Regulation and Function Series 2

### Message from the Guest Editor

For this Special Issue of *Cells*, we invite authors to submit contributions, in the form of original research articles, reviews, or shorter perspective articles, on all aspects related to the theme of “Actin–Myosin Cytoskeleton Regulation and Function”. Articles with mechanistic and functional insights from cell and molecular biological, biophysical, biochemical, structural and mathematical perspectives are especially welcome. Relevant topics include, but are not limited to, the following:

- Regulators of the actin–myosin cytoskeleton;
- Cytoskeleton-mediated mechanotransduction;
- Actin–myosin cytoskeleton dysregulation in human disease;
- Disease-associated genetic mutations in actin–myosin cytoskeleton components and regulators;
- Organelle trafficking and positioning by the actin–myosin cytoskeleton;
- Actin–myosin structures in cell motility;
- The role of the actin–myosin cytoskeleton in endocytosis and intracellular trafficking.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
