Topical Collection

Cystic Fibrosis: Cells, Physiopathology and Emerging Therapies

Message from the Collection Editors

Even though CFTR has long been described as a chloride channel expressed at the apical membrane of epithelial cells, more recent studies have convincingly shown that in addition to airway epithelial cells, the protein is expressed in cells involved in inflammatory responses (neutrophils, macrophages, different subsets of lymphocytes, etc.), fibroblasts, pancreatic islet cells, bone cells, and many others. Therefore, it remains essential to improve our understanding of CF pathophysiology in each impacted cell type to develop new therapeutic strategies. This present Topical Collection aims at shedding light on cell types and subtypes impacted by the presence of CFTR mutations; the value of cell-based models to study CF physiopathology and to quantify efficacy of emerging therapies; and how novel CF therapeutic strategies rescue CFTR-dependent cell processes. We look forward to your contributions.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. Cells encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
