

Special Issue

Genome Dynamics in Pancreatic Cancer Biology and Therapy

Message from the Guest Editors

We are delighted to invite you to contribute to a Special Issue of *Cells* titled “Genome Dynamics in Pancreatic Cancer Biology and Therapy”. Pancreatic ductal adenocarcinoma (PDAC) remains a major challenge in cancer medicine with a desperate need to develop better treatment strategies. In fact, despite significant research efforts, PDAC still displays the highest mortality rate among all solid tumors in mankind. Major causes for its devastating disease outcome are the exceptionally aggressive tumor biology and the remarkable resistance to conventional anti-tumor treatments. Compelling evidence exists that both characteristics are univocally driven by disturbed genome dynamics—e.g., defects in genomic stability or altered chromatin regulation and transcription. This Special Issue of *Cells* aims to understand how altered genome dynamics drive PDAC development, progression, and therapy resistance and will aid in revealing novel translational strategies exploring the potential of targeting genome dynamics in PDAC treatment.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
