Special Issue

microRNA as Biomarker II

Message from the Guest Editors

There are thousands of microRNAs, thus individual microRNAs can be used as biomarkers. In particular, since the so-called circulating microRNAs reflect the whole body's status and can be analyzed by relatively noninvasive methods, they can be used as biomarkers of various diseases, of the progression of biological processes, e.g., differentiation and development, and even as prognostic factors. microRNAs can be conserved between not-so-closely related species, e.g., humans and mice. Thus, investigations to identify individual microRNAs that are conserved and therefore represent biomarkers might help us understand the differences between species. All kinds of studies related to microRNA as biomarkers are of interest to this Special Issue.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
