

Special Issue

Advanced Surface Plasmon Resonance Sensors

Message from the Guest Editors

The unique optical and electrical characteristics of nanomaterials and dielectric films have enabled the progress of applications such as localized surface plasmon resonance (LSPR) and surface-enhanced Raman scattering (SERS). Furthermore, lithographic patterning of nanopatterned structures has resulted in high spatial resolution surface structures, while improving system sensitivity. In this Special Issue, we would like to compile the most recent theoretical and experimental research results related to this measurement principle, sensing formats, fabrication techniques, integration with artificial intelligence, optimization, and applications of surface plasmon sensors in industrial situations. Therefore, we invite you to submit original research or review articles for this Special Issue, with emphasis on the most recent advances in SPR, or LSPR-based chemosensors, and their applications to the examination of chemical and biological samples. Dr. Erick Reyes-Vera

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Nicole Jaffrezic-Renault

Institute of Analytical Sciences, UMR CNRS 5280, Department LSA, 5
Rue de La Doua, 69100 Villeurbanne, France

Prof. Dr. Jin-Ming Lin

Department of Chemistry, Beijing Key Laboratory of Microanalytical
Methods and Instrumentation, Tsinghua University, Beijing 100084,
China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Engineering Village and other
databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -
Q2 (Analytical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 17.1 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the first half of 2024).
