

Special Issue

Photoelectrochemical (Bio)sensors for Biological, Food, and Environmental Analysis

Message from the Guest Editors

Photoelectrochemical (PEC) (bio)sensors are a new class of analytical devices operating on the basis of the PEC properties of materials and can be applied to the (bio)sensing of various biological targets, metabolites, food/beverage/cosmetic ingredients, environmental pollutants. In recent years, to overcome the possible defects of a single material, versatile composites have been constructed to heterojunctions for improving PEC response sensitivity and selectivity to a specific analyte of interest. This Special Issue of *Chemosensors* focusses on the design and development of PEC (bio)sensors, especially their applications in biological, food, and environmental analysis. We look forward to receiving papers on the relevant topics.

- Photoelectrochemical(bio)sensors
- Novel materials for PEC (bio)sensing
- Novel PEC (bio)sensing principles
- Immunosensors
- Imprinted polymers
- Functional nanomaterials
- Semiconductor nanomaterials
- Heterojunctions
- Aptasensors
- Disease diagnostics
- Environmental analysis
- Food analysis
- Air pollutants

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Department of Chemistry, Beijing Key Laboratory of Microanalytical Methods and Instrumentation, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, UMR-CNRS 6213, University of Franche-Comté, 16 Gray Road, 25030 Besançon, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q2 (Analytical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
