

Special Issue

Application of Laser-Induced Breakdown Spectroscopy

Message from the Guest Editor

I am delighted to organize a Special Issue in the journal *Chemosensors* on the topic “Application of Laser-Induced Breakdown Spectroscopy”. The main purpose of this SI is to report the recent progress made in the application of LIBS in different fields to provide a clearer picture on how this technology should be developed in the future and to show how powerful it is to people who are interested in elementary chemical analysis. Any interesting applications with unique facility design, quantification methods, understanding improvement, and successful demonstration are welcome.

About the Journal

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Engineering Village and other
databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -
Q2 (Analytical Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 17.1 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the first half of 2024).
