

## Special Issue

# Modern Directions in Ion Electroanalysis for Real World Applications

### Message from the Guest Editor

Ion sensing with electrochemical techniques is undoubtedly among the pillars of the digitalization era. From wearable sensors to submersible probes, ion electroanalysis has demonstrated tremendous potential in miniaturized gadgets able to monitor the fluctuation of ion concentrations. Furthermore, the appropriate interpretation of these outcomes in certain time, space, or inter-subject domains provides unprecedented information related to important socioeconomical aspects, such as clinical diagnosis, disease monitoring, water quality control, and cell-scale processes. Any real world application is attainable owing to a deep understanding of the fundamentals embracing the sensing core of the ion detection principle. Thus, the integration of basis science and analytical applications has advanced towards a true decentralization process of accurate ion measurement. The aim of this Special Issue is to collect current fundamental directions in ion electroanalysis in view of further analytical applications, but also demonstrations at the lab scale and through the on site assessment of real world uses.

## About the Journal

### Message from the Editorial Board

*Chemosensors* continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

### Editors-in-Chief

Prof. Dr. Nicole Jaffrezic-Renault

Institute of Analytical Sciences, UMR CNRS 5280, Department LSA, 5  
Rue de La Doua, 69100 Villeurbanne, France

Prof. Dr. Jin-Ming Lin

Department of Chemistry, Beijing Key Laboratory of Microanalytical  
Methods and Instrumentation, Tsinghua University, Beijing 100084,  
China

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Engineering Village and other  
databases.

#### Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -  
Q2 (Analytical Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 17.1 days after  
submission; acceptance to publication is undertaken in 2.6  
days (median values for papers published in this journal in  
the first half of 2024).
