

## Special Issue

# Chemometrics Tools Used in Chemical Detection and Analysis

### Message from the Guest Editor

Chemometrics is defined as the application of statistical and mathematical methods to analytical data to permit the maximum collection and extraction of useful information. The utility of chemometric techniques as tools enabling the multidimensional calibration of selected spectroscopic, electrochemical, and chromatographic methods is demonstrated. The uses of this approach, mainly for the interpretation of UV–Vis, near-IR (NIR), or mid-IR (MIR) spectra, as well as for data obtained with other instrumental methods, make identification and the quantitative analysis of active substances in complex mixtures possible. This special Issue aims to share knowledge and experiences in relation to the use and exploration of different and multifaceted chemometric techniques in areas such as chemistry, biochemistry, pharmaceuticals, food, beverages, etc. I, therefore, wish to invite all those interested in publishing their research work or reviews in this Special Issue addressing the most diverse areas of chemometrics.

---

### Guest Editor

Dr. Pedro N. Sousa Sampaio

COPELABS—Computação e Cognição Centrada nas Pessoas, Faculty of Engineering, Lusófona University, Campo Grande, 376, 1749-024 Lisbon, Portugal

---

### Deadline for manuscript submissions

15 May 2025

## About the Journal

### Message from the Editorial Board

*Chemosensors* continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

### Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Department of Chemistry, Beijing Key Laboratory of Microanalytical Methods and Instrumentation, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, UMR-CNRS 6213, University of Franche-Comté, 16 Gray Road, 25030 Besançon, France

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

#### Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q2 (Analytical Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
