Adverse Childhood Experiences: Prevention, Intervention, and Access to Care Update

Message from the Guest Editors

Exposure to adverse childhood experiences has been recognized as a public health crisis in the United States by leading organizations such as the American Academy of Pediatrics (AAP), the National Child Traumatic Stress Network (NCTSN), and the Substance Abuse and Mental Health Services Administration (SAMHSA). Early exposure to stress and trauma have both short- and long-term physical and mental health outcomes across the lifespan. Healthcare settings are increasingly recognized as key venues to identify, intervene, and ameliorate the impact of adverse childhood experiences and build resilience among at-risk youth and their families. Considering the success and popularity of the Special Issue entitled “Adverse Childhood Experiences: Prevention, Intervention, and Access to Care”, previously published in the journal *Children* (https://www.mdpi.com/journal/children/special_issues/adverse_childhood_experiences_prevention_intervention_care), we are now releasing a second issue with the aim to gather original research papers and review articles related to adverse childhood experiences.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MI 65201, USA
