New Trends in Perinatal and Pediatric Epidemiology

Message from the Guest Editor

New Trends in perinatal and pediatric epidemiology perinatology and pediatric epidemiology are closely related disciplines of obstetrics (fetal and maternal medicine) and pediatrics (neonatology). Science is developing rapidly. More and more diseases are being classified into increasing numbers of subtypes, primarily due to the diversity of the genetic background. Prenatal diagnostics and genetics are developing rapidly. Newer procedures, like CMA and WES, enable more tests to take place. In addition to statistical calculations, the processing of causes is also an important task of epidemiology. We welcome authors to provide their latest results on a particular topic and a summary of their previous results, and we are particularly interested in meta-analyses and more interesting case reports, as well as descriptions of rare diseases.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MI 65201, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
