

Special Issue

Childhood and Adolescent Obesity and Weight Management: 2nd Edition

Message from the Guest Editors

Obesity is a leading preventable cause of morbidity and mortality worldwide, with rapidly and unrelentingly increasing rates in children and adolescents.

Considering the success and popularity of the Special Issue "Childhood and Adolescent Obesity and Weight Management" previously published in the journal *Children*

(https://www.mdpi.com/journal/children/special_issues/Obesity_Weight_Management), we now release a

Second Issue aimed to gather original research papers and review articles focused on Childhood and Adolescent Obesity and Weight Management. We encourage submissions that explore how chronic stress and physical, cognitive, developmental, behavioral and mental health conditions may impact on childhood and adolescent body weight and relate to obesity complications.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MI 65201, USA
