Congenital Cleft Lip and Palate: Diagnosis, Treatment and Management

Message from the Guest Editors

While there have been significant advancements in medical and dental technologies in recent years, the application of advanced technology in cleft lip and palate (CLP) management continues to encounter several challenges and limitations, particularly in children and newborns. The need for specialized equipment, the application of digital technology and advanced surgical/non-surgical techniques, and the introduction of innovative protocols are some of the domains that require further exploration. This Special Issue aims to explore the latest advancements in digital technology and innovative protocols that may revolutionize CLP management in the treatment of children with cleft lip and palate, offering more precise orthodontic, orthopedic, and surgical outcomes and enhanced patient care. From novel orthodontic and surgical techniques to virtual rehabilitation programs, this Special Issue aims to showcase the transformative potential of digital technology and innovative clinical protocols in enhancing the outcomes and quality of life for children and infants with cleft lip and palate.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MI 65201, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
