

## Special Issue

# Pediatric Upper Limb Pathology

### Message from the Guest Editors

The diversity of pediatric upper extremity pathology is very wide (including congenital, neurological, traumatic, or sporting causes), and the idiosyncrasy of patient management in children and adolescents has very specific particularities. It is essential to have a broad knowledge of the basics of these diseases and their management. Likewise, their management is in constant evolution thanks to newly implemented therapeutic techniques and to the greater and better evaluation of results, achieving studies of increasing scientific rigor. Therefore, as an international expert and protagonist of this progress that you are, it would be an honor to have your latest research and reflections on the pathology and therapeutic management of the pediatric upper extremity. All types of articles are welcome, with particular interest for meta-analyses, systematic reviews, clinical trials, cohort studies, or case control studies.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
