# Recent Advances in Maternal and Fetal Health

## Message from the Guest Editors

Improving prenatal care has been the main focus over the last few decades in this complex and rapidly evolving field of maternal-fetal medicine. Developing new tools in ultrasound diagnosis, expanding prenatal genetic diagnosis, finding new screening strategies for severe conditions such as preeclampsia or preterm birth, and implementing preventive measures have been the latest achievements aiming to reduce maternal and fetal morbidity and mortality. The aim of this Special Issue of *Children* is to highlight recent advances in the fields of maternal and fetal medicine, including prenatal diagnosis of fetal genetic and structural abnormalities, new insights in the management of chronic or gestational maternal conditions, and new screening strategies of various pregnancy complications involving both the fetus and woman. Particular interest is focused on the fields of maternal hypertensive disorders. intrauterine growth restriction, recurrent pregnancy loss, preterm birth or stillbirth, and genetic and structural fetal abnormalities.

# **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

### Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

## **Author Benefits**

### **Open Access**

 free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC. Embase, and other databases.

### **Journal Rank:**

JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
