Management of Infants and Neonates with Tetralogy of Fallot

Message from the Guest Editor

Tetralogy of Fallot has a wide morphologic spectrum from mild pulmonary stenosis to pulmonary atresia. This dictates a tailored approach to management in infants. The timing of repair has also gone through paradigm shifts over the last two decades. This Special Issue attempts to dissect these anatomic and management variations as well as introduce newer trans-catheter strategies.

Guest Editor

Dr. Ranjit Philip

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MI 65201, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
