Mesenchymal-Stem-Cell- Based Therapeutic Strategies via Extracellular Vesicles

Message from the Guest Editor

Mesenchymal stem cells (MSCs) have garnered significant attention for their therapeutic potential, which appears to be largely mediated through their paracrine activity and the secretion of extracellular vesicles (EVs). MSC-derived EVs have emerged as promising therapeutic agents in their own right, exhibiting a range of beneficial effects in various disease models. Many searches result highlight the significant therapeutic potential of MSC-derived extracellular vesicles and the various strategies being explored to enhance their clinical utility for the treatment of a wide range of diseases and injuries.

Guest Editor

Dr. Yasunari Matsuzaka

Division of Molecular and Medical Genetics, Center for Gene and Cell Therapy, The Institute of Medical Science, The University of Tokyo, Minato-ku, Tokyo 108-8639, Japan

Deadline for manuscript submissions

closed (30 September 2024)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,
New Zealand

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,
PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and
other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.8 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the second half of 2024).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and
reviewer names are published annually in the journal.
