

## Special Issue

# The Role of Neuroinflammation in Neurodegenerative Diseases

### Message from the Guest Editor

Neuroinflammation, characterized by the activation of glial cells and the release of inflammatory mediators, has emerged as a key player in the pathogenesis of disorders such as Alzheimer's disease, Parkinson's disease, and multiple sclerosis. This Special Issue will bring together cutting-edge research that elucidates the molecular mechanisms driving neuroinflammation, its impact on neuronal function and survival, and the potential for targeting these pathways in therapeutic strategies. Contributions will include original research articles, reviews, and perspectives that address how neuroinflammatory processes influence disease progression, and the development of novel biomarkers and interventions. This Special Issue aims to foster a deeper understanding of neuroinflammation's role in neurodegeneration, paving the way for innovative treatments that could alter the course of these debilitating diseases.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,  
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,  
New Zealand

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,  
PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and  
other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the first half of 2024).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and  
reviewer names are published annually in the journal.
