

## Special Issue

# Climate Impact on Human Health

### Message from the Guest Editors

Within the framework of global warming, climate change affects social systems, economic systems, and ecosystems as well as posing serious challenges to the survival and development of human societies. Among these, climate change threatens public health in particular. Evidence from studies has shown that climate change not only increases the risk of occurrence of human infectious diseases, chronic diseases, and even acute injuries or premature deaths but also causes mental health problems of varying degrees. Addressing climate change requires the participation of the whole society, and requires scientists, economists, and others to conduct research on climate health risk assessment and prediction, as well as theories and methods of climate change policy assessment, in order to facilitate policymakers' decisions and choices. Based on the above, we cordially invite scientists and economists academics to contribute with their research papers on various aspects of climate change and human health.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Timothy G. F. Kittel  
Institute of Arctic and Alpine Research, University of Colorado Boulder,  
Boulder, CO 80309-0450, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

##### Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) /  
CiteScore - Q2 (Atmospheric Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.9 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2024).
