# **Special Issue**

## The Built Environment in a Changing Climate: Interactions, Challenges and Perspectives

### Message from the Guest Editors

Worldwide, the built environment is being strongly challenged by climatic alterations (escalation of both weather extremes and mean trends) that put a strain on (i) energy needs for cooling and release of anthropogenic heat, (ii) mortality and morbidity due to overheating and air pollution, (iii) productivity and wellbeing, and (iv) accessibility to public spaces and social prosperity. Therefore, what is the future of the urban realm in a changing climate? What is the role of a growing population with expanding patterns of urbanization and consumption? How can we mitigate buildings' and cities' burden on local/global environmental change? In this framework, this Special Issue aims at publishing high-quality papers targeting the following goals:

### Guest Editors

Dr. Giulia Ulpiani

Postdoctoral Research Associate at School of Civil Engineering, The University of Sydney, Sydney, Australia

#### Dr. Michele Zinzi

Smart Energy Division, Energy Technologies Department, ENEA - Italian National Agency for New Technologies, Energy and Sustainable Economic Development, Via Anguillarese 301, 00123 Rome, Italy

### Deadline for manuscript submissions

closed (31 January 2021)

### Message from the Editor-in-Chief

### Editor-in-Chief

Dr. Timothy G. F. Kittel Institute of Arctic and Alpine Research, University of Colorado Boulder, Boulder, CO 80309-0450, USA

### **Author Benefits**

#### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) / CiteScore - Q2 (Atmospheric Science)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.9 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2024).
