

Special Issue

Recent Advancement in Thin Film Deposition, Characterization, and Surface Engineering (Second Volume)

Message from the Guest Editors

Thin film deposition, characterization, and surface engineering are eminent topics, attracting significant interest among the scientific community. The subjects include the experimental, theoretical, and fabricating issues associated with the development of new thin film materials and processes, novel methods of analysis and characterization, and approaches for industrial applications. This Special Issue focuses on science and engineering for a wide spectrum of aspects related to thin films, coatings, and plasma technologies for sustainable energy, semiconductor, optoelectronics, flexible device, tribological, organic, biological, protective, and functional surface engineering. The topics of interest for this Special Issue, in particular, include (but are not restricted to):

- Nanostructured and nanocomposite thin films;
- Semiconductor, optoelectronic, and flexible device thin films;
- Tribological and protective thin films;
- Sustainable energy thin films;
- Organic and biological thin films;
- Metallic and high-entropy alloy thin films;
- Theory, simulation, and modeling; quantitative surface analysis of thin films.

Guest Editors

Prof. Dr. Ming-Tzer Lin

Graduate Institute of Precision Engineering, National Chung Hsing University, Taichung 402204, Taiwan

Dr. Pei-Kang Sun

Applied Optoelectronics, Inc., Sugar Land, TX 77478, USA

Deadline for manuscript submissions

closed (20 November 2023)

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.
