

Special Issue

Progress in Surfactants with Low Environmental Impact

Message from the Guest Editors

This Special Issue aims to report recent advances in surfactant science, including the deployment of new processes and surfactant molecules tailored to attain promising performance properties. These comprise:

- New surfactants and low environmental impact processes to comply with new industry regulations, e.g., polyethoxylated surfactants with low dioxane content, and/or surfactants derived from biobased or lignocellulosic materials, which partially or entirely substitute the petroleum-derived content.
- Innovative biobased or biosurfactants, including the study of their behavior at surfaces and interfaces and their applications.
- Innovative use of correlations to formulate with surfactants, including Hydrophilic-Lipophilic Deviation (HLD), Hansen Solubility Parameters, and molecular dynamic simulations to predict properties.
- Applications of surfactants in pioneering processes such as biorefineries, new detergent, pharmaceutical or cosmetic formulations, wastewater remediation, metal recuperation from battery waste, and use in advanced (bio)fuels, among others.

Guest Editors

Dr. Johnny Bullon

Lab FIRP, Universidad de Los Andes, Merida, Venezuela

Dr. Ronald Marquez

Laboratoire Physico-chimie des Interfaces Complexes, ESPCI Paris, 10 rue Vauquelin, F-75231 Paris, France

Dr. Franklin Zambrano

Solenis LLC, Wilmington, DE, USA

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Reinhard Miller
Institute for Condensed Matter Physics, Technical University
Darmstadt, D-64289 Darmstadt, Germany

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus /
SciFinder, Inspec, and other databases.

Journal Rank:

CiteScore - Q2 (Chemistry (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 21 days after
submission; acceptance to publication is undertaken in 5
days (median values for papers published in this journal in
the first half of 2024).
