Colloids Science in Asia

Message from the Guest Editors

Colloid science is an important area of knowledge describing systems where molecular and nanoscale phenomena impart key properties. Colloidal phenomena are related to the adsorption, aggregation, and self-assembly of material dispersions, where the interactions between phases and at interfaces are dominant aspects of the system behavior. Colloid and interface science has a critical role in the industrial design and manufacture of almost any chemical and many bio-industry “finished” products (e.g., medicines and biocides, foods, personal care and household care products, ceramics and composites, paints and coatings). They are also key ingredients for the so-called ‘nanotechnology revolution’. Owing to the growing interest and importance of modern colloid and interface science in Asian countries, we invite researchers to contribute original research articles and review articles dealing with all aspects of colloids in Asia. You could enjoy a full fee-waiver (equal to 1500 CHF) for your submission to this Special Issue. Please kindly note that the resubmission could not enjoy the benefit of the fee waiver, in case of the paper is rejected after peer review.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Reinhard Miller
Institute for Condensed Matter Physics, Technical University
Darmstadt, D-64289 Darmstadt, Germany

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus /
SciFinder, Inspec, and other databases.

Journal Rank:

CiteScore - Q2 (Chemistry (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 21 days after
submission; acceptance to publication is undertaken in 5
days (median values for papers published in this journal in
the first half of 2024).
