

Special Issue

Using New Technologies in Cyber Security Solutions (2nd Edition)

Message from the Guest Editors

In this Special Issue of *Computers*, original research articles and reviews are welcome. The main topic of research is cyber security. Novel technologies and methods that can be used in cyber security fields are acceptable. Example research areas may include (but are not limited to) the following:

- Using blockchain technologies on cyber security solutions;
- Using LLMs, deep learning and active learning on cyber security solutions;
- IoT, virtualization and cloud computing security;
- Security and privacy issues in metaverse;
- Using post-quantum cryptographic solutions;
- Secure smart contracts;
- Cyber-attacks on blockchain technology...

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, a comprehensive review or a software paper for consideration and publication in Computers (ISSN 2073-431X). Computers is an international, peer-reviewed, open access journal which provides an advanced forum for computer sciences. Computers is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.
