

Special Issue

Organic Photonics: Organic Optical Functional Materials and Devices

Message from the Guest Editors

Organic, optical, functional materials and devices have potential application prospects in imaging, information security, industry, sensing, and medical treatment, and are the core of future photonics development. It is our pleasure to announce that *Crystals* has launched a new Special Issue on the research topic of “Organic Photonics: Organic Optical Functional Materials and Devices”. As you are a leading expert in related fields, we would like to sincerely invite you to participate in this Special Issue by submitting your recent research results or a review in your field of interest. Your contribution may cover research topics such as the new designs of light-emitting diodes, light-emitting materials and devices, organic flexible driving material, organic smart material, recording, integrated optics, processing of organic materials for applications, laser devices based on micro- or nano-structured or micro- or nano-cavity lasers, random lasers, non-Hermitian, parity-time symmetry, sensors, or photodetection techniques.

Guest Editors

Dr. Yaoxing Bian

Dr. Xiaoyu Shi

Dr. Junhua Tong

Deadline for manuscript submissions

30 June 2025

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli
Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
