

Special Issue

Crystallographic Studies of Enzymes (Volume II)

Message from the Guest Editors

In this Special Issue, we intend to collect research manuscripts on enzyme crystallography. However, since the goal of this issue is to provide rich resources on enzymes regarding their structural and functional aspects, we also encourage manuscript submissions of studies on the structure, function, and application of enzymes, which would provide complementary information for enzyme crystallography.

- crystallization methods and developments
- crystallographic determination of enzyme structures
- enzyme engineering based on crystal structures
- computational and modeling studies of enzymes
- structure-based applications of enzymes

Guest Editors

Prof. Dr. Kyeong Kyu Kim

Department of Molecular Cell Biology, School of Medicine, Sungkyunkwan University, Suwon 16419, Republic of Korea

Prof. Dr. T. Doohun Kim

Department of Chemistry, College of Natural Science, Sookmyung Women's University, Seoul 04310, Korea

Deadline for manuscript submissions

closed (31 March 2022)

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli
Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
