

Special Issue

Recent Progress in Lithium Niobate

Message from the Guest Editors

The different applications require different forms of LiNbO₃ such as bulk, thin film, nanocrystal and composite. In this special issue studies are welcomed dealing with different preparation techniques of different forms of LiNbO₃, theoretical and experimental investigation of their structure and research on specific developments and novel applications. We would like to open this Special Issue to all these related fields:

- Crystal growth techniques
- Crystal defects, computer modelling
- Nanocrystals and nanopowders
- Thin films
- Composites
- Lithium niobate waveguides
- Integrated optics
- Nonlinear optics
- Photonics
- Photovoltaics
- THz-wave generation

Guest Editors

Dr. Robert A. Jackson

School of Chemical and Physical Sciences, Keele University, Keele, Staffordshire ST5 5BG, UK

Dr. Zsuzsanna Szaller

Wigner Research Centre for Physics, Budapest, Hungary

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli
Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
