

Special Issue

Pharmaceutical Crystals (Volume II)

Message from the Guest Editors

We are delighted to invite you to submit an article for the “Pharmaceutical Crystals (Volume II)” Special Issue of *Crystals*. The 1st Special Issue attracted much attention and successfully published ten high-quality articles, and it will be available as a printed book in 2020. This significant success of the 1st issue strongly indicates that the Pharmaceutical Crystals field is quite attractive for many researchers. In light of this, we have decided to launch a 2nd Special Issue in *Crystals* on “Pharmaceutical Crystals”. The Special Issue on “Pharmaceutical Crystals” aims to publish novel molecular and crystal structures of pharmaceutical compounds. We especially encourage the submission of works of new crystal structures of APIs, including polymorphs and solvate crystals, and of multicomponent crystals of APIs, including co-crystals and salts, which would be related to changes in the physicochemical properties of pharmaceutical crystals.

Keywords:

- Pharmaceutical crystals
- Co-crystals
- Salts
- Solvates
- Physicochemical properties
- Crystal engineering

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
