

Topical Collection

Light and Laser Dentistry

Message from the Collection Editors

We invite you to submit your studies on light and laser dentistry. Several studies are currently focusing on the materials and lights used daily in practices. Their interactions with oral tissues can induce, produce or provoke biological effects that can be appreciated or unwished. Knowledge of their process of interaction is necessary to improve the quality of treatments or products and to avoid side effects. Furthermore, several lights have been proposed for oral treatments in different fields. The understanding of their effects on biological material can improve or prohibit their applications (e.g., bio-activation, bio-modulation, magnetic properties, mechanical properties, chemical properties, tissue overheating, etc.). Thus, studies focused on light applications, matters used in oral treatments and fundamental studies can enlighten us the interaction process with biological oral tissues and improve the quality of oral treatments. Research and clinical studies focused on the application of light on the various oral hard and soft tissues would enlighten the biological and interactive mechanisms that can eventually improve the quality of treatment for oral conditions and needs.

About the Journal

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Claude Jaquiéry

Department for Cranio-Maxillo-Facial Surgery, University Hospital
Basel, Spitalstrasse 21, CH-4031 Basel, Switzerland

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Dentistry, Oral Surgery and Medicine) /
CiteScore - Q2 (General Dentistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2024).
