Behaviour of dental Material in Oral Environment

Message from the Guest Editor

Restorative dental material behavior in the oral cavity is often affected by numerous factors that can lead to early failure or dissatisfaction of the patient. Dental material behavior is influenced by the unique combination of an elaborate oral environment and functionally demanding occlusal loads, which make it one of the most challenging outcomes to evaluate. Continuous changes in the oral environment may have a negative impact on the performance of restorative dental materials, which is mainly related to biodegradation and deteriorate. Chemical degradation depends on an acidic diet or the softening effect of food-simulating liquids. The effects of chemical degradation usually lead to surface softening and roughening, which can decrease the long-term durability of the restorations.

About the Journal

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Claude Jaquiéry

Department for Cranio-Maxillo-Facial Surgery, University Hospital
Basel, Spitalstrasse 21, CH-4031 Basel, Switzerland

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Dentistry, Oral Surgery and Medicine) /
CiteScore - Q2 (General Dentistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2024).
