

## Special Issue

# Studies on Dental Enamel

### Message from the Guest Editor

Dental enamel is one of the most important tissues in the human body. Although highly mineralized, it is susceptible to degradation, making it the scientific community's role to obtain a full understanding of how this tissue behaves when it encounters external and internal agents. The purpose of this Special Issue is to gather multidisciplinary contributions on novel studies pertaining to the characterization and assessment of dental enamel in both in vivo and in vitro studies. Literature reviews, new clinical application techniques and clinical cases pertaining to diagnosis, tissue evaluation and preventive treatments are also welcome. This Special Issue provides a great opportunity for scholars to exchange and discuss their research.

- enamel
- hydroxyapatite
- lesions
- de/re-mineralization
- diagnostic
- preventive dentistry

---

### Guest Editor

Dr. Sofia Pessanha

Laboratory of Instrumentation, Biomedical Engineering and Radiation Physics (LIBPhys-UNL), Department of Physics, NOVA School of Science and Technology, NOVA University of Lisbon, 2829-516 Caparica, Portugal

## About the Journal

### Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Dentistry, Oral Surgery and Medicine) /  
CiteScore - Q2 (General Dentistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2024).
