

## Special Issue

# Oral Health Care in Paediatric Dentistry

### Message from the Guest Editor

Oral health is an integral part of general health and enables people to live without discomfort or embarrassment. Early childhood is a key period in the construction of healthy life habits that affect oral health. Worldwide children have a high rate of dental disease, and this burden of illness is mostly represented by children in low-income and socially disadvantaged families. There is sound evidence that preventive dental visits improve oral health and reduce later costs, and good evidence that fluoridation therapy and fissure sealants decreases the rate of dental caries, particularly in high-risk populations. Untreated carious lesions commonly lead to a poor quality of life with functional, aesthetic, and psychological problems. Paediatric dentists play an important role in identifying children at high risk for dental disease and in advocating for more comprehensive and universal dental care for children. In this Special Issue, papers that explore the etiology, prevalence, symptoms, risk factors, evaluation strategies, treatments, dental trauma and any other aspect of oral health in children are welcome.

## About the Journal

### Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Dentistry, Oral Surgery and Medicine) /  
CiteScore - Q2 (General Dentistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2024).
