

Special Issue

Person-Centred Dentistry

Message from the Guest Editors

Despite an overall improvement in oral health worldwide in recent decades, many oral health problems persist, both in developing and developed countries. At the same time, as society has changed, so have patients' expectations. Person-centred care (PCC) in dentistry faces a paradox: While it is promoted by patients, academics, and dental leaders all around the world, it remains an understudied topic. This Special Issue of the *Dentistry Journal* aims at collecting papers and presenting the latest findings in this field of research. More specifically, we welcome papers that explore (but are not limited to) the following topics:

- PCC experimentations (e.g., measures for a better access to dental care), and evaluations in dentistry;
- Dental clinical examples of how PCC can be conducted in day-to-day routine;
- PCC implementation in dental educational programs or public health policies.

We encourage different types of submissions on this subject, including research papers, reviews, case reports, position papers or narratives. Qualitative or mixed methods studies are encouraged to gain needed insight into patients' or dentists' perspectives.

Guest Editors

About the Journal

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Claude Jaquiéry

Department for Cranio-Maxillo-Facial Surgery, University Hospital
Basel, Spitalstrasse 21, CH-4031 Basel, Switzerland

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Dentistry, Oral Surgery and Medicine) /
CiteScore - Q2 (General Dentistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2024).
