

## Special Issue

# Regenerative Approaches in Dental Sciences

### Message from the Guest Editors

This Special Issue will cover a wide range of topics: various regenerative approaches including biomimetic materials, bioactive molecules, and stem cell-based therapy that have been explored, as well as the aspects that have now been deployed in routine clinical practice, including guided tissue regeneration and bone augmentation in periodontal surgery and implantology, and regenerative endodontics for pulpal revascularization. We invite authors to contribute original research or comprehensive review articles highlighting novel regenerative approaches in dental sciences.

## About the Journal

### Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Dentistry, Oral Surgery and Medicine) /  
CiteScore - Q2 (General Dentistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2024).
