Educational Case Reports in Dermatopathology

Message from the Guest Editor

Dermatopathology runs Special Issues to create collections of papers on specific topics. The aim is to build a community of authors and readers to discuss the latest research and develop new ideas and directions of research. Who are experts in the subject and oversee the editorial process for papers lead Special Issues. Now we start a new initiative—we aim to collect and publish case reports as teaching tools in dermatopathology. With this in mind, we would like to dedicate this Special Issue to the discussion of teaching cases in dermatopathology. We would like to share experience: if a case has challenged us, it will probably challenge and intrigue others, and reading about it may give a clue, or at least a hint, for a better understanding. Please send us your latest case report highlighting the main message and the difficulties you experienced on the way to diagnosis and/or in their management.

About the Journal

Message from the Editor-in-Chief

I have the great pleasure of announcing that *Dermatopathology* has received an updated Impact Factor of 1.6 for June 2024, maintaining its position as the highest rated Impact Factor journal among all the existing dermatopathology journals (with an increasing impact on clinico-pathological correlation articles for clinical dermatologists).

This immense success is a result of the excellent work of our Editorial Team, who have engaged in the meticulous selection and peer reviewing of high-quality articles covering different aspects of cutaneous pathology. This journal publishes case reports, communications, full articles, research articles and reviews on clinical, molecular, and investigative dermatopathology in several Special Issues per year. The journal's publications are indexed in PubMed. I encourage all the specialists in cutaneous pathology to submit any original research to *Dermatopathology*.
