Detection of Urinary Biomarkers: From Current to Future Challenges

Message from the Guest Editor

Dear colleagues, The need for sensitive tests to detect early kidney disease and damage remains a high priority. The kidney is particularly susceptible because of its high blood supply and transcellular transport system. Over the last 50 years, a variety of biomarkers of effect, progression and prognosis have been identified. Biomarkers are used to detect nephrotoxic drugs, industrial and environmental nephrotoxicity and kidney disease in patients and animals. Future work should include the development of point of care devices and improved assay techniques. Biomarkers should be defined in terms of the stage of renal damage/disease they reflect. As improvement in technology becomes available, these tests will become more widely used, especially in developing countries. This Special Issue contains a summary of the current use of biomarkers and potential development in medicine, industrial areas and the environment, together with details of cutting-edge technology. Prof. Dr. Robert G Price

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
