

Special Issue

Molecular Diagnostics of Infectious Diseases

Message from the Guest Editor

The main objectives of this special issue are to provide an overview of current molecular techniques based early diagnosis in infectious diseases, antimicrobial resistance and antiviral resistance and to review the new possibilities of diagnostic candidates for early antimicrobial resistance detection and early diagnosis of infectious diseases. The scope of the special issue can include but not be limited to:

- Diagnostic strategies in tuberculosis/dengue/malaria/COVID-19/infectious diseases
- Potential diagnostic biomarkers for infectious diseases
- Comparison of diagnostic techniques for bacterial infections
- Development of electrochemical genosensors for simultaneous detection of bacterial infections
- Bioinformatics based diagnostic tools for early detection of antimicrobial resistance

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.
