Advances in the Diagnosis and Management of Gynecological Oncology

Message from the Guest Editors

Genital cancer represents a significant public health problem, being one of the leading causes of death among women. Advances in oncological research have led to considerable progress, offering various diagnostic and therapeutic methods for successfully managing these life-threatening pathologies with improved prognosis and quality of life. Screening programs also contribute to early cancer detection and allow early case management. This Special Issue aims to disseminate the results of research in the field of genital neoplasia to improve the long-term prognosis of patients and increase the quality of life of genital malignancy patients and survivors, families and caregivers. The continuous development of science in the field of oncology has led to the discovery and implementation of new methods of diagnosis and therapy that support specialists in the fight against cancer. To this end, we are interested in original research, short communications of preliminary but significant results, reviews and case reports that will present the latest advances in the gynecology oncology field and lead to improved diagnostic and treatment processes.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
