Lung Images of Acute Respiratory Distress Syndrome

Message from the Guest Editor

Acute Respiratory Distress Syndrome (ARDS), characterized by non cardiogenic pulmonary edema, is a life threatening disease with a mortality rate approaching 50%. ARDS has no specific treatment, except for the treatment of the causative disease (i.e., antibiotics for pneumonia), and only supportive measures are available, consisting in mechanical ventilation, and eventually, extracorporeal support in more severe cases. Imaging offers pivotal insights into the pathophysiology of the disease, allowing to visualize the “in vivo” anatomy of the disease. This Special Issue will summarize the state-of-the-art lung imaging, starting with CT scan morphological imaging, exploring the possibility of substituting CT bedside data obtained with ultrasound and EIT and their limitations. Attention will be devoted also to experimental techniques aimed at imaging lung inflammation. Lastly, ARDS must be seen through a broader perspective, including the roles of the heart and mediastinum.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
