

## Special Issue

# Potential Biomarkers and Promising Theranostics Approaches of Diabetes

### Message from the Guest Editor

Globally, Diabetes Mellitus (DM) is among the most common chronic diseases. Its incidence is increasing with an alarming velocity, despite the establishment of diabetes prevention programs. Both DM and its complications have deleterious effects on individual and global health. The early diagnosis and effective treatment of DM and its complications are among the issues that researchers focus on. The Special Issue entitled "Potential Biomarkers and Promising Theranostics Approaches of Diabetes" will encompass research articles, case reports, and literature reviews about novel biomarkers in the diagnosis of diabetic complications as well as innovative theranostics approaches both in the diagnosis and treatment of diabetes mellitus and its complications. The Special Issue will include but is not limited to: novel biomarkers of diabetes mellitus and its complications, especially diabetic kidney disease, diabetic foot ulcers, retinopathy, and neuropathy; theranostics approaches in the diagnosing and treating of diabetes-related conditions; and advancements in biomedical sciences regarding theranostics approaches in diabetic populations.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
