Diagnosis and Management of Budd-Chiari Syndrome: An Update in 2023

Message from the Guest Editor

Budd–Chiari syndrome (BCS) is characterized by significant clinical and pathophysiological aspects that seem to allow a sharp differentiation between a variant in the West from one in the East. However, both diagnostic features and treatment of BCS should be managed by experienced clinicians, who are familiar with BCS. In fact, difficulties in diagnosis are frequent and there are different possible therapeutic approaches available. The former issue regards the need of agreed standardized criteria for BCS diagnosis. The latter concerns a diagnostic approach to focal liver lesions in BCS. Moreover, the timing of treatment for BCS has been a hotly debated issue. In particular, the so-called step-wise strategy for the management of BCS, generally suggested by guidelines, albeit not supported by strong evidence, has been challenged by some recently published experiences, suggesting that early interventional treatment could improve the outcome. The aim of this Special Issue is to focus on the main issues and controversies centred around both the diagnosis and management of BCS.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
