Circulating Tumor Cells as Cancer Diagnostic Biomarkers

Message from the Guest Editor

The major cause of cancer mortality is metastasis; however, the mechanisms of clinical metastasis remain poorly understood. Because tumor cell dissemination mostly occurs through the blood, deciphering biomarkers, properties and characteristics of circulating tumor cells (CTCs) are of fundamental relevance to develop and implement novel drug therapies in oncology. CTCs can act as “liquid biopsy” to diagnose and monitor cancer in patients in “real time”. They represent clinically useful tools to better reflect cancer progression, nascent metastatic disease, and therapy efficacy in the patient. The objective of this Special Issue is to publish latest findings of CTC research.

Contributions outlining CTC discoveries in biological and clinical settings, CTC theoretical and pre-clinical models, CTC technologies and methods for their detection, and clinical findings applying CTC concepts, are welcome.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
