Biomarkers: Diagnostic Indicators for Human Ailments

Message from the Guest Editor

Biomarkers, indicators of medical conditions, play a pivotal role in both research and clinical settings. These quantifiable measures, observed externally, offer accurate and reproducible insights into a patient's health state. Their significance spans basic and clinical research, as well as routine clinical practice, and they have become integral even as primary endpoints in clinical trials. By assembling comprehensive insights and discussions, this Special Issue strives to offer a holistic view of the diverse applications and implications of biomarkers across a spectrum of medical domains. The overarching goal is to enhance understanding among researchers, clinicians, and the medical community at large, thereby fostering the development of innovative diagnostic tools, effective treatment strategies, and improved patient outcomes. Through a multidimensional exploration of current biomarker research, this issue seeks to illuminate the path forward for harnessing the power of biomarkers in shaping the future of medicine.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
