

## Special Issue

# Imaging-Histopathology Correlation

### Message from the Guest Editor

Imaging techniques, alone or in hybrid, help to noninvasively visualize healthy and diseased organs and tissues in 2D or 3D with spatial resolutions ranging from millimeter to sub-micrometer, with data quantification using computer software. However, in clinic definite diagnosis of the disease usually relies on the depiction of pathological alterations at cellular, subcellular, and molecular levels, which can be realized only by using the gold-standard technique of histopathology. Likewise, the accuracy of imaging diagnosis can be verified by such decisive histopathology sampling through needle biopsy, open surgery, and autopsy. Medical imaging and histopathology belong to macro- and microscopic morphology, respectively. Their qualitative and quantitative correlations are always what clinical and preclinical researchers strive to achieve, being more recently aided by big data and artificial intelligence (AI). This Special Issue welcomes contributions covering all aspects of experimental and clinical imaging-histopathology correlations as addressed above.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
