Biomarkers in Multiple Sclerosis: From an Early Diagnosis to an Accurate Prognosis

Message from the Guest Editor

Although the early diagnosis and treatment of multiple sclerosis is associated with better patient outcomes, many people remain undiagnosed or are initially misdiagnosed. Furthermore, the identification of patients at high risk of disease activity and disability progression is still a major unmet therapeutic aim. The aim of this Special Issue is to shed light on the new biomarkers which can help physicians in making the diagnostic work-up more accurate while also improving the accuracy in predicting disease activity, disability progression, and treatment efficacy. Clinical (both physical and cognitive), radiological, and biological diagnostic or prognostic markers will be welcome. Original papers and reviews will be accepted.

Guest Editor

Prof. Dr. Massimiliano Calabrese

Multiple Sclerosis Center of Neurology Clinic, Department of Neurosciences, Biomedicine and Movement, University Hospital of Verona, (Policlinico GB Rossi, Borgo Roma), Piazzale L.A. Scuro 10, 37134 Verona, Italy

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
