Advances in Diagnosis and Treatment of Bone and Soft Tissue Sarcoma

Message from the Guest Editor

Recently, the prognosis has been improved for diagnosing and treating bone and soft tissue sarcoma in the extremities due to advances in surgical techniques, chemotherapy, and imaging modalities. Survival in patients with bone and soft tissue sarcoma improved in the 1990s and 2000s. However, orthopedic oncologists have still faced infiltrative aggressive tumors, unresectable tumors, and advanced metastatic tumors. The prognosis has not changed over the last 20 years. To overcome those, new diagnoses and treatments should be developed. Therefore, in this Special Issue, I would like to invite original papers and review articles that describe possible new techniques of diagnostic devices, surgery, and radiotherapy. Possible chemotherapy and immunotherapy for improving survival in patients with bone and soft tissue sarcoma are also welcome. Both basic and clinical research are invited.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
