Recent Advances in Biomarkers and Technologies that Support Preventive Medicine, Improved Clinical Outcomes and Value-Based Care

Message from the Guest Editors

Healthcare is rapidly evolving, empowered by the development of new technology and automation. Clinical laboratories should keep pace with these changes to stay relevant and deliver cost-effective care and improved outcomes. Towards this goal, this Special Issue will focus on new blood-based biomarkers (single and multiplex assays) and technologies that enable early diagnoses, continuous monitoring, automation and easy implementation in rural and underserved areas to deliver value-based care. Topics include, but are not limited to, the following:

- a: New biomarkers or panels for the early detection of cancer, brain injury and neurological defects;
- b: Advancements in fluorescence labeling and detection technologies that facilitate the quantitation of proteins in lower ranges (below picograms per milliliter);
- c: Technologies that support the continuous monitoring of electrolytes, lactate, high-sensitivity troponin and other critical markers;
- d: Near-patient testing platforms that allow both CBC and metabolic panel testing.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
