# Critical Limb Threatening Ischemia in the COVID Era

### Message from the Guest Editor

Critical limb-threatening ischemia (CLTI) is a fascinating field of research; in fact, this disease is associated with mortality, amputation, and impaired quality of life. The evaluation and management of CLTI represent our goals to improve pivotal research. Haemodynamic testing, imaging patterns, and inflammatory molecules are all potential biomarkers that can be considered to update our understanding and treatment of limb ischemia. We aim to promote a proper diagnostic flow-chart and follow-up after treatment by focusing on all of these aspects.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
