Image-Based Diagnostics and Radiometabolic Therapy of Differentiated Thyroid Cancer

Message from the Guest Editors

Well-differentiated thyroid cancer (DTC), which includes papillary carcinoma and follicular carcinoma, represents the vast majority of all thyroid cancers and the most frequent endocrine malignancy. The incidence of DTC is increasing worldwide due to the widespread use of thyroid ultrasound (US), but mortality is stable over the years as more cancers are diagnosed at a very early stage. In this Special Issue, we encourage researchers to submit original papers, review articles, brief communications, or comments on current image-based diagnostics and radiometabolic therapy of DTC. Papers focused on novel diagnostic and therapeutic tools, radiomics, and personalized medicine are also welcome.

Guest Editors

Prof. Dr. Angela Spanu

Nuclear Medicine Unit, Department of Medicine, Surgery and Pharmacy, University of Sassari, Sassari, Italy

Dr. Giuseppe De Vincentis

Department of Radiological Sciences, Oncology and Anatomical Pathology, Sapienza University of Rome, Rome, Italy

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
